Summary

Full Stack Developer with 1.8 years of experience building scalable web and desktop applications using C#, ASP.NET Core, and ASP.NET MVC. Skilled in Web API, Entity Framework, ADO.NET, LINQ, Angular, and SQL Server with strong database design and optimization expertise. Hands-on experience with N-Tier architecture and design patterns like Repository and Singleton for clean, maintainable code. Effective team player in Agile/Scrum environments, focused on delivering high-quality and performance-optimized solutions.

Technical Skills

Backend : C#, ASP.NET MVC/Core, ASP.NET Web Forms, Web API, REST API, Entity Framework (EF), ADO.NET, LINQ

Frontend : Angular (SPA), HTML5, CSS3, Bootstrap, JavaScript (ES6), jQuery, Responsive Web Design

Database : MS SQL Server, Query Optimization, Data Modeling, Indexing, Transactions Management

Tools & Methodologies : Visual Studio, Visual Studio Code, SSMS, Git, Postman, Debugging, Performance Optimization, Agile (Scrum)

Soft Skills : Communication, Problem Solving, Adaptability, Team Collaboration

Experience

Full Stack Developer

June 2024 – Present

Techsum Technology Pvt Ltd

Responsibilities

- Designed and developed secure, scalable web and desktop applications using C#, ASP.NET, ASP.NET MVC/CORE, covering all phases of the SDLC.
- Built responsive and user-friendly interfaces using HTML5, CSS3, Bootstrap, JavaScript, jQuery, AJAX, and Angular 17.
- Developed Angular 17 components, services, modules, routing, and reactive forms for dynamic single-page applications.
- Integrated Angular applications with ASP.NET Web APIs to ensure secure and efficient data exchange.
- Implemented database operations using ADO.NET, Entity Framework, LINQ, and optimized SQL Server objects including stored procedures, views, functions, and triggers.
- Applied OOPs principles and design patterns such as MVC, Repository, and Singleton to deliver clean, reusable, and maintainable code.
- Developed reusable frontend components and optimized backend business logic and data access layers.
- Translated business and functional requirements into clear technical specifications and implementation plans.
- Improved database performance by optimizing SQL queries and implementing indexing strategies, reducing data retrieval time by up to 50%.
- Built real-time and interactive dashboards using Angular, AJAX, jQuery, and partial views.
- Used Git for source control, managing branching strategies, merge workflows, and version control in team environments.
- Participated in code reviews to ensure code quality, security standards, and best practices.
- Assisted in mentoring junior developers and supported team members with debugging and technical guidance.
- Implemented authentication and authorization mechanisms, including role-based access control for secure applications.
- Collaborated with QA, UI/UX, and business teams to resolve defects and ensure smooth releases.
- Handled application debugging, performance tuning, and production support to maintain system stability and reliability.

Projects

TechSocietyConnect (Society Management) **Role:** Team Member

Technologies Used : C#, ASP.NET MVC / CORE, Web API, MS SQL Server, ADO.NET, jQuery, AJAX, JavaScript

- Developed Meeting Management module using ASP.NET MVC for scheduling and managing society meetings.
- Implemented backend logic with ADO.NET for meeting creation, updates, and tracking.
- Designed and optimized SQL Server tables and stored procedures for meeting data and MOM.
- Built responsive meeting management UI using HTML, CSS, Bootstrap, JavaScript, and jQuery.
- Implemented role-based authentication and authorization for Admin and Committee members.
- Integrated AJAX and JSON APIs for real-time meeting updates without full page reloads.
- Enabled features like agenda management, attendee tracking, and meeting notifications.
- Improved performance by optimizing SQL queries and reducing load time for meeting listings and reports.

Chain2Pay (P2P ERP) **Role:** Team Member

Technologies Used : C#, ASP.NET MVC, MS SQL Server, ADO.NET, Web API, Angular, jQuery, AJAX, JavaScript

- Built Procure-to-Pay (P2P) module handling PR/PO, GRN, invoicing, and payment workflows.
- Developed vendor onboarding, PR/PO, GRN processing, and 3-way matching logic.
- Implemented secure procurement data management using SQL Server and ADO.NET.
- Designed role-based approval workflows to control access to sensitive procurement data.
- Created MIS and analytical reports for vendor activity, PO lifecycle, GRN, and payments.
- Optimized SQL queries, stored procedures, and indexing to improve system performance.
- Collaborated with finance and procurement teams to align ERP workflows with business processes.
- Handled end-to-end module enhancements, bug fixes, and performance tuning in a live ERP environment.

TS ClientHub (CRM) **Role:** Team Member

Technologies Used : C#, WinForms, ADO.NET, SQL Server

- Developed a standalone CRM system using C WinForms to manage customer, sales, and admin operations.
- Built role-based dashboards for Customer Executive, Sales Executive, Manager, and Admin users.
- Displayed real-time enquiries, follow-ups, meetings, and tasks using dynamic DataGridViews.
- Implemented lead tracking, follow-up reminders, and appointment scheduling for sales workflows.
- Created manager-level dashboards to monitor enquiry lifecycle, team performance, and conversions.
- Developed admin features for user management, access control, and master data maintenance.
- Integrated notifications and reminders for overdue follow-ups, meetings, and assigned tasks.
- Optimized SQL queries, stored procedures, and ADO.NET operations to improve dashboard performance.

Education

Bachelor Of Computer Science (BCS) **Passing Year**
Savitribai Phule Pune University(SPPU) 2024
