

Jenish Devmurari

Software Engineer

✉ jenishdevmurari77@gmail.com ☎ +91-9328302016  LinkedIn  GitHub 📍 Ahmedabad, Gujarat

Education

B.E in Information Technology,
L. D. College Of Engineering Ahemdabad
CGPA : 8.83

2020 – 2024 | Ahmedabad, India

HSC(12th), Ashadeep Uchchattar Madhyamik Shala
Percentage : 83.23%

2018 – 2020 | Surat, India

Professional Experience

Codesmiths (Client : ProdCrowd AI, Forensic Cybertech),
Full Stack Software Engineer ☑

Jul 2024 – present | Ahmedabad, India

- **Developed secure backend solutions** using ASP.NET ☑ Web API and SQL Server, implementing JWT authentication and authorization to protect user data and ensure efficient data access.
- **Created and maintained microservices** for email marketing, user notifications, and legal document processing, improving client engagement and operational efficiency. Utilized AWS services such as **S3, RDS, CloudFront,** and **EC2,EBS** for scalable and reliable solutions.
- **Worked on training OpenAI assistant models** and integrating them into APIs, enhancing automation capabilities and providing intelligent responses in customer-facing applications.
- **Built and deployed a responsive frontend** using Angular, React, and Bootstrap. Integrated HubSpot for lead generation and AI-powered chatbots to streamline user interaction and automate client support.
- **Integrated Stripe** for seamless payment processing, ensuring secure transactions and enhancing client onboarding with automated billing solutions.
- **Managed a comprehensive CI/CD pipeline** on AWS, enabling continuous integration, automated testing, and smooth deployments, optimizing development workflows and minimizing downtime.

Bacancy Technology LLP, Software Engineer (.NET + Angular) ☑

Jan 2024 – Jul 2024 | Ahmedabad, India

- Completed task-based learning assignments focused on fullstack development using Angular and .NET Core.
- Developed projects from scratch, applying theoretical knowledge to practical applications.
- Worked on integrating APIs to facilitate seamless data exchange between frontend and backend.
- Implemented JWT-based authentication to secure applications.
- Engaged in code reviews and contributed to improving coding standards.

Skills

- Languages: C, C++, C#, HTML, CSS, SCSS, Javascript,XML
- Web Technologies & Frameworks: TypeScript, Angular, React, Node.js, Tailwind CSS, Bootstrap, .NET Core, .NET Web API, Entity Framework Core(ORM)
- AI Engineering: Prompt Engineering, AI Model Integration (OpenAI, Gemini), Workflow Automation (n8n, custom orchestration), Intelligent API Agents
- Database: SQL Server, MySQL, Postgresql
- Soft Skills: Communication, Team Collaboration, Problem-Solving
- Cloud & DevOps: AWS (S3, EC2, RDS, CloudFront, ECS), Azure (VMs, App Services, Storage), Firebase (Auth, Firestore, Cloud Functions), Supabase (Edge Functions, Postgres, Storage), CI/CD (GitHub Actions, AWS Pipelines)
- Integration: Stripe (Payment Gateway), HubSpot (CRM and Lead Generation), Telnyx (SMS Campaigns)
- Tools: Git / GitHub / Bitbucket, Postman (API Testing), xUnit (.Net Testing), Jasmine / Karma (Angular Unit Testing)

Projects

Habitat App – Secure AI-Powered Legal Service Platform, Tech

Jul 2025 – Present

Stack: Supabase (Edge Functions, PostgreSQL, Storage), Firebase, Cloud Functions, TypeScript, Deno

- Implemented backend architecture using **Supabase**, managing **authentication**, **secure data storage**, and **Edge Functions** for modular APIs.
- Developed **custom Supabase Edge Functions** for user onboarding, OTP verification, and secure configuration management.
- Integrated **Firebase Authentication** with **Supabase Database** for unified user and provider management.
- Built and optimized **serverless functions** handling token validation, rate-limiting, and user session management.
- Implemented **Supabase Storage** with signed URLs and S3-compatibility for secure file handling.
- Created automated deployment pipelines for Supabase using **GitHub Actions**, ensuring smooth staging and production releases.
- Collaborated with the frontend team to design robust API contracts for the Flutter app, focusing on reliability and performance.

ProdCrowd AI - AI-Powered Business Automation Platform,

Aug 2024 – Present

Tech Stack: .NET Core, Angular, OpenAI API, n8n, SQL Server, Firebase, Telnyx, Mailgun, HubSpot API

- Developed an AI-driven platform offering industry-specific automation use cases across domains such as Sales, Wealth Management, and HR.
- Built and integrated microservices powered by OpenAI models for intelligent lead engagement, email/SMS automation, and business logic execution.
- Used n8n (low-code automation) to orchestrate workflows that seamlessly connected third-party tools like HubSpot, Telnyx, and Mailgun.
- Designed scalable architecture enabling plug-and-play use cases for non-technical users through visual workflow builders.
- Contributed to AI prompt engineering, backend service development, and API integrations for cross-platform automation.

Chitragupt – AI-Powered Mobile Forensics Suite,

Dec 2024 – Oct 2025

Tech Stack: WPF (MVVM), C#, SQL Server, LocalDB, AI/ML

- Developed a robust desktop application using WPF and MVVM architecture for secure mobile forensic data extraction and analysis.
- Integrated AI/ML capabilities for automated detection of key evidence patterns, optimizing investigation timelines.
- Implemented secure modules for data acquisition, validation, and evidence chain tracking to support legal admissibility.
- Utilized SQL Server and LocalDB for scalable local storage of extracted forensic datasets.
- Designed a user-friendly interface with input validations, advanced filtering, and offline accessibility for field use by investigation teams.
